

Bruins Sprint 1 Progress Report

Our original meeting with Prof Goggins was scheduled for 4pm on Saturday. Prof Goggins emailed us last minute and said he would not be able to make it and said he could meet at 8:30 or the next day. We replied via email and discord and we could meet at 8:30 but when we joined the zoom he wasn't there and we were not able to reach him. As of doing this Sunday evening he has not responded to our email or discord messages so we have not met with him yet and are not 100 percent certain on the sprint 1 requirements.

As far as requirements we have currently:
created a GitHub for our group project
created an AWS instance with a running instance of Augur
created the requirements analysis document
established a sprint 1 fork of Augur on the GitHub
